

Our git workflow

Git branches

- main = the stable version everyone agrees works.
- your-branch = your personal working area.
- friend-branch = your friend's area.

Upload to your own branch by:

*For initial push use this command: `git push -u origin <Your branch name>`

`git checkout main`

`git pull` # make sure main is up to date

`git checkout <Your Name Here-dev>`

`git add .`

`git commit -m "Describe changes"`

`git push *`

Merging to main:

Just commit and push onto your branch, I (Csaba) will merge the files 😊 .

Task	Command
Save Unity work	<i>(Save Scene & Project)</i>
Stage changes	<code>git add .</code>
Commit	<code>git commit -m "Description"</code>
Push to GitHub	<code>git push</code>

Task	Command
Get teammate's updates	git pull
Create new feature branch	git checkout -b feature-name
