

Our git workflow

Git branches

- main = the stable version everyone agrees works.
- your-branch = your personal working area.
- friend-branch = your friend's area.

Upload to your own branch by:

git checkout main

git pull # make sure main is up to date

git checkout -b <Your Name Here-dev>

git add .

git commit -m "Describe changes"

git push

Merging to main:

Just commit to main, I will merge the files 😊 .

Task	Command
Save Unity work	<i>(Save Scene & Project)</i>
Stage changes	git add .
Commit	git commit -m "Description"
Push to GitHub	git push
Get teammate's updates	git pull

Task	Command
